aggregate capacity of 1157.42 MW (up to 25 MW station capacity) have so far been installed and 155 such projects with an aggregate capacity of 399.68 MW are under implementation.

(c) and (d) There has been a substantial increase in the installed capacity of small hydro power projects (up to 3 MW station capacity) during the last 10 years. Their capacity has recorded a three fold increase from 63 MW to 217 MW.

In order to give further thrust and focussed attention to this important area, the subject of small hydro between 3 MW to 25 MW has been transferred from Ministry of Power to Ministry of Non-conventional Energy Sources. Four promotional incentive schemes have been announced in order to promote development of small hydro projects in the extended range.

The thrust of the Ministry's programmes is to develop SHP with private sector participation. For this, an interest subsidy scheme is being operated to provide concessional loans to private sector investors through financial institutions like IREDA, REC, PFC etc. Assistance is also given to private entrepreneurs for Survey & Investigation and Detailed Project preparation.
